- Exclusive software introduces a new level of interactive communication
- HDMI-input for video playback devices and game consoles
- ASUS exclusive Real-time Webcam Image Capture Technology intelligently boosts image sharpness and brightness

All-in-One PC
Full-fledged PC and
HD entertainment center with
a space saving minimalist design

Say Goodbye to Your Cluttered Desktop

The ET2002's minimalist design and slim form factor ensures a small desktop

Connect and Communicate Through an
Intuitive User Interface

footprint. Its light and compact design also makes it the ideal all-in-one, plug-and-play PC. That billing is further reinforced by its fast and easy start-up. So plug in the power cable and boot up, because the days of cluttered desktops and messy wiring are over.

Experience the Very Definition of Hi-def Entertainment

Experience movies and games like never before with the EeeTop PC ET2002. It represents a breakthrough in PC technology with the integration of the Intel® Atom™ dual core processor and NVIDIA® ION™ graphics processor with a 20-inch flushed high definition widescreen display. With a 16:9 aspect ratio, HD support and HDMI compatibility, the ET2002 delivers crystal clear, true-to-life visuals.

Together with its embedded deluxe stereo speakers featuring SRS Premium Sound™ with virtual 5.1 surround sound, it immerses you in a truly exceptional multimedia entertainment experience.

The ASUS EeeTop PC has been designed to help you maximize your Windows® 7 experience. Eee Docking's various shortcuts give you easy access to digital content, the web, and other useful software. Its user-friendly interface enables you to adjust your multimedia settings, as well as share data with other Eee PCs, notebooks or desktops without accessing the Internet. Eee Docking's four submenus (Eee Amuse, Eee Sharing, Eee Xperience, and Eee Tools) make your everyday computing experience easier.

You can stop posting notes on the refrigerator door because Eee Memo lets you leave personal notes or video messages for your loved ones.

The built-in webcam, fitted with the ASUS exclusive Real-time Image Capture Technology, provides a superior image quality at 30-frames-per-second; while its enhanced sensitivity to light ensures great images even in low-light settings.
