

UL80Ag Stunningly Light, Powerfully Beautiful

The new ASUS UL80Ag is a harmonious blend of form and function. Powered by an Intel® Core™2 Duo processor, it boasts an impressive 12-hours* battery life for all-day computing, switchable hybrid graphics and DDR3 system memory, as well as powerful multimedia entertainment with Altec Lansing® and SRS Premium Sound™. These features can be found in an ultra-light notebook that is generously cloaked in brushed aluminum and measuring less than 1-inch in profile.

Specifications

Intel® Core™2 Duo Processor SU9400/SU7300 : 1.4 GHz - 1.3 GHz,

High Definition Multimedia Entertainment

The powerful visual extravaganza of the ASUS UL80Ag is complemented by a pair of angled Altec Lansing® high definition speakers which are 30% more powerful compared to those found on conventional notebooks. The angle of the speakers also allows audio to be 'bounced' upwards from any surface to provide better amplification, delivering a wider frequency range, which in turn produces lower pitches that allow users to hear every reverberation of the drums, as well as every note in pitch perfect quality. Enhanced by SRS Premium Sound™, they provide a virtual surround audio experience to the powerful speakers.

Ultra-portable All-day Computing

The ASUS UL80Ag is designed specifically for individuals who desire an all-day computing companion, minus the bulk and weight of a conventional notebook. The ASUS Power4Gear facilitates the deployment and usage of power according to the users' preferences in relation to the specific tasks that they need to perform. It also provides users with the option to turn off hardware devices to conserve even more energy, enabling users to manage their power usage more effectively, as well as an Intel® Core™2 Duo ultra-low voltage processor for maximum energy efficiency. The ASUS UL80Ag is shrouded in a robust brushed aluminum lid which not only looks magnificent, but also helps in maintaining its stylish exterior day after day.

High Definition Mobile Visual Performance

The ASUS UL80Ag features a 14-inch high definition display with a 16:9 aspect ratio, powered by Intel® GMA 4500MHD graphics for graphically intensive applications to provide stunning visuals and incredible special effects and transitions.
